

## Blood Test Analysis

- RBC Count:  $4.5 \times 10^6/\mu\text{L}$
- WBC Count:  $5.2 \times 10^3/\mu\text{L}$
- Hemoglobin:  $11.8 \times 10^3/\mu\text{L}$
- Platelets:  $161.0 \text{ g/dL}$

## Test Results

TESTS	VALUES
RBC Count	0
WBC Count	11.0
Platelets	250
Hemoglobin	14.5
Glucose	90
Cholesterol	180

## Report Summary

### Care Suggestions

Diagnosis: Your CBC report shows that you have mild anemia (low hemoglobin) and slightly low MCV, indicating microcytic red blood cells. Your WBC and platelet counts are within normal limits, and the differential count shows a balanced distribution of white blood cells.

## Care Suggestions

### Care Suggestions

Cure: The underlying cause of your anemia needs to be determined through further evaluation, which may include additional blood tests and possibly a clinical examination. Treatment options will depend on the specific cause identified by your doctor.
